

# Course in Aural (Ear) Health

Course Code 10026NAT

THEBENCHMARKGROUP  
excellence in education

The **Course in Aural (Ear) Health** is designed to offer students the opportunity to develop the skills and knowledge to assess and manage aural health in relation to a range of conditions based on detailed knowledge of the anatomy, physiology and pathophysiology of the auditory system.

**Date:** Friday, 2 February 2018

**Venue:** Quest Port Adelaide  
Fishermen's Wharf Market  
36 N Parade  
PORT ADELAIDE, SA 5015

**Cost:** \$475.00 including GST

Register early as places are limited and will fill quickly.

and select from the drop down list

The human auditory system is one of the engineering masterpieces of the human body. At the heart of the system is an array of miniature acoustic detectors packed into a space no larger than a pea. These detectors can faithfully transduce vibrations as small as the diameter of an atom, and they can respond a thousand times faster than visual photoreceptors.

Although humans are highly visual creatures, much human communication is mediated by the auditory system and the loss of hearing can be as socially debilitating as blindness.

Maintaining and promoting good aural (ear) health should be an important foundation in the care of all patients and it is an essential skills for all health professionals.

Assessing the aural health of a patient should be a systematic and structured process. It requires a comprehensive assessment of general client health incorporating all of the key structures of the auditory system.

The Course provides successful students with the ability to apply a broad knowledge of management strategies, client centred education and related physical functions to health promotion, and provision of basic care and advice in relation to aural health.
