Foundations of General Practice Nursing Workshops

APNA is thrilled to deliver the highly regarded Foundations of General Practice Nursing Workshops Australia wide.

General practice nursing is unlike other areas of nursing practice. Attending a Foundations workshop is the perfect way to build on your expertise.

Developed and delivered by local nurse leaders, this highly engaging two-day workshop provides an overview of the key skills and knowledge required by nurses new and transitioning into general practice.

Gain up to 12 hours of APNA endorsed CPD while you learn, engage and network with nurses who understand what it's like to work in general practice.

On completion of the workshop, participants will have an understanding of the roles and responsibilities associated with:

- The Australian healthcare system and primary health care
- Professional practice and professional development
- Clinical assessment and chronic disease management
- Wound management
- Immunisation
- Quality and safety
- Infection prevention and control
- Information management and digital health

Adelaide 27 & 28 April

Here are a few quotes from our attendees:

Thank you so much! Came away feeling empowered!

Loved the workshop. So glad I went along. Learnt heaps and met some nice people.

So good to meet other nurses in similar roles.

I found this very helpful having never had an orientation to General Practice Nursing

Nurses new to General Practice

Foundations of General Practice Nursing APNA WORKSHOP

General practice nursing is unique and unlike other areas of nursing practice. APNA's Foundations workshop provides nurses with an understanding of roles, responsibilities and skills necessary for working in a general practice environment. Across two engaging days, nurses will have the opportunity to learn from and network with peers, as well as upskill and share experiences.

Topics covered:

- The Australian healthcare system and primary health care
- Professional practice and professional development
- Clinical assessment and chronic disease management
- Wound management
- Immunisation
- Quality and safety
- Infection prevention and control
- Information management and digital health
