

# Managing Borderline Personality Disorder in the Perinatal Period

FOR GPs

## DATE & TIME

6.30 -9.30pm

Wednesday 20<sup>th</sup> June 2018

## VENUE

Jarmer's Kitchen  
18 Park Terrace  
Hindmarsh SA 5007

Light dinner provided  
No cost to attend

This session will provide GPs with a better understanding of BPD in the perinatal period. Presenter Dr Anne Sved Williams will discuss the intergenerational effects on infants of maternal BPD, the available referral pathways and how to perform risk assessments on mothers with their infants.

## LEARNING OUTCOMES

- Identify how General Practitioners can have a better understanding of borderline personality disorder in the perinatal period.
- Discuss the intergenerational effects on infants of maternal BPD.
- Discuss how the GP can have an improved understanding of families with a BPD parent.
- Discuss the referral pathways available for people with borderline personality disorder in the perinatal period.
- Identify the risk assessment of mothers with their infants, both in terms of suicidal and infanticidal ideation and plans, and pathways to safe care.
