Sonder has a long history of building and sustaining workforce development. Sonder has developed a variety of networks which bring together health professionals from general practices of medical specialists. We currently provide support to Practice Managers, Nurses, GPs and Practice Owners.

Through conducting quarterly meetings, Sonder supports members of the Practice Managers Network by acting on their recommendations, providing strategic advice on all matters relating to running a general practice, and assisting them to find ways to manage patient health through better referrals process and improved use of the MBS scheme.

**Topic:** Changes to the Notifiable Data Breaches (NDB) scheme and the implications for General Practice Staff.

In February 2018, changes were made to the NDB scheme that have far reaching implications for medical practices and staff. Alison Fitzgerald, Head of Medical Defence Services at Avant, will talk through those changes and provide case studies and direction as to what medical practices must do in order to meet established requirements for responding to data breaches.
