

Practice Owners Network

For GPs & General Practice Owners

Sonder has a long history of building and sustaining workforce development. Sonder has developed a variety of networks which bring together health professionals from general practices of medical specialists. We currently provide support to Practice Managers, Nurses, GPs and Practice Owners.

Members of Sonder's Practice Owners Network have the opportunity to attend quarterly network meetings. The network provides members with a forum to; build the capacity of general practices, learn about the changing face of the primary health sector, share opportunities to improve the patient experience, be inspired by a range of exciting speakers and be a voice for change.

Topic: Pathology & Diagnostic Imaging Rental Arrangements

Following the 2016 federal election, the Federal Government announced that it would be seeking to change the rules for Pathology Approved Collection Centre rental arrangements to provide greater clarity on the definition of market value and in doing so, increase the enforceability of the legislation.

The Department of Health has updated the Red Book, issued on 30 January 2018, providing guidance on prohibited practices in commercial relationships between referrers and providers of pathology and diagnostic imaging services.

This presentation will unpack the significant changes including;

- Legislated market rate requirements
- Factors for determining market value for rent
- Increased compliance and enforcement measures
- The potential financial impact on practices
- Process for seeking independent assessment/valuation of market value.

Agenda

- 6.00pm – 6.30pm** Registration and dinner
