

Updates & Management Options for Groin Hernias & Primary Hyperparathyroidism

FOR GPs

DATE & TIME

6.30 -9.30pm

Monday 18th June 2018

VENUE

Jarmer's Kitchen
18 Park Terrace
Bowden SA 5007

Light dinner provided
No cost to attend

This session will provide GPs with an update on groin hernias and primary hyperparathyroidism. The presenters will discuss the diagnosis and management of these conditions and provide information on the referral pathways available.

LEARNING OUTCOMES

- Describe various investigation options available for hypercalcemia.
- Discuss the different categories of primary hyperparathyroidism (PHPTH) and their diagnosis and management.
- Outline the role of an endocrine surgeon in treating patients with PHPTH to improve their quality of life and discuss various referral pathways.
- Explain the anatomy of the groin and how it relates to groin hernias.
- Discuss how to implement a systematic approach for investigating patients with symptoms suspicious for groin hernias and referral pathways for urgent surgical management.
