

We are looking for frontline healthcare workers in South Australia to join the BRACE trial

Image: SA Health

We want to find out if the existing BCG vaccine could provide an immune system boost to protect against the worst of COVID-19's symptoms.

What's involved? You will be asked to:

Have an initial
blood test

Be randomly allocated
to receive the BCG
vaccine or placebo

Download an app to
record respiratory
symptoms and fever

Be tested for SARS-
CoV-2 if you have
suggestive symptoms

Complete online surveys
at 3, 6, 9, 12 months

Have follow up
blood tests at
3 and 12 months

Additional information

- You can participate anytime after 72 hours of receiving your flu immunisation.
- BCG Immunisations will be administered by experienced clinical staff at the RAH Chest Clinic.
