Presenter, Dr Leong Tiong will provide attendees with an update on investigation, assessment and treatment of breast cancer. The session will also cover oncoplastic breast surgery and managing and providing care for patients after breast cancer treatment.

## Learning objectives

- Explore current investigation and management options available for your patients diagnosed with breast cancer.
- Discuss the current advances in breast imaging and breast cancer treatment.
- Summarise oncoplastic breast surgery, its complications and side effects.
- Improve patient safety through appropriate management, long-term follow-up and care required post breast cancer treatment.
