

FREE EVENT

Peer support network.

Peer support for GPs, nurses, pharmacists and allied health professionals

Why come?

Cancer-related distress can affect our patients/
clients, as well as ourselves, so self-care is important.

Evidence suggests being a member of a peer group can help
prevent isolation, stress and burnout.

Struggling with a difficult case, keen to debrief or learn from others?

Come along to network, gain new perspectives from the
interdisciplinary team and find peer support.
