

Hepatitis C Virus

For GPs, Nurses & Allied Health Professionals

Date & Time

6.30 - 9.00 pm
Tuesday 19th March 2019

Venue

Sfera's Park Suites
& Convention Centre
191 Reservoir Road
Modbury SA 5091

Free dinner provided

In this education session, presenters will provide attendees with an update on the risk factors associated with hepatitis c virus (HCV) and the management options available. The presenters will also provide information on liver cirrhosis tests and how to choose and initiate the most appropriate HCV treatment for patients.

Learning objectives

- Discuss the risk factors for HCV screening, determine who to test and how to accurately interpret test results.
- Describe the new DAA therapy for the treatment of hepatitis C and competence in selecting and prescribing appropriate DAA therapy.
- Assess and manage patients for liver cirrhosis using non-invasive tests.
- Monitor your patients who are receiving HCV treatment and implement appropriate recall systems in your practice for regular follow-ups post treatment.
- Discuss various referral pathways available in the region for patients diagnosed with HCV.
