Suicide response training aims to create empathy and challenge stigma by helping health professionals develop their understanding of suicidal behaviour, suicide mitigation and promotes their role in suicide prevention.

Module 2 covers how to develop a collaborative and transparent approach to mitigating suicide risk and how to increase a person's resilience to suicidal thoughts.

Learning outcomes

- Develop skills to create comprehensive, person-centred bio-psychosocial suicide mitigation plan.
- Identify the limitations of a stratified assessment for suicide risk.
- Familiarise with updated and standardised terminology for describing suicidal thoughts and actions.
- Increase the potential of achieving better patient outcomes through improved inter-service/ practitioner communication and feel confident when making referrals using the SAFETool.
- Engage in a comprehensive social support mapping exercise and help patients develop personally significant strategies to increase their resilience and safety plan for responding to suicidal thoughts.
