

Treating Opioid Dependence

For GPs, Pain Specialists and Psychiatrists

Date & Time

6.30 - 9.30pm
Wednesday 13th February 2019

Venue

Sage Hotel
208 South Terrace
Adelaide SA 5000

Light dinner provided
No cost to attend

This educational meeting has been developed for pain medicine and addiction specialists, GPs & Psychiatrists treating opioid dependence in their clinics.

The presenters are experts in their respective fields and will be sharing case studies and practical guidance for treatment of opioid dependence.

Case studies will increase attendee's understanding of the management of patients with opioid dependence and will use an interactive format providing an opportunity for attendees to contribute to questions and discussion related to challenges in this treatment area.

Dr McDonough will present the logistical requirements of MATOD in South Australia.

Learning outcomes

- Identify risk for opioid problems (including dependence/addiction) and recognising opportunities for prevention of such opioid-related problems.
- Manage CNCP with comorbid opioid dependence.
- Understand the new sociopsychobiomedical paradigm of pain.
- Recognise the key roles of allied health practitioners in the management of CNCP.
- Understanding the limited role of long-term opioid therapy in the management of CNCP.
