

Update on Type 2 Diabetes Management, Foot Disease, Diabetes Services & NALHN Referral Pathways

For GPs, Nurses & Allied Health Professionals

Presenters, Dr Zimmermann, Dr Stranks, Dr Barrett & Ms Henwood will provide an update on type 2 diabetes and its management. The presenters will also discuss the importance of diabetic foot care in the general practice setting information on various diabetes and endocrine services and referral pathways available in the NALHN region.

Learning objectives

- Describe the role of GLP-1 and SGLT-2 in T2 diabetes management.
- Discuss the side-effects and contra-indications of the new oral hypoglycaemic agents.
- Identify patients in your practice with diabetic foot disease and improve patient safety by referring them for specialist review via appropriate referral pathways.
- Outline the role of diabetes educators and discuss ways they can assist GPs in managing diabetes and its complications.
