Other Program Key Priority Area Description

Provide additional support to consumers who are accessing Psychosocial support

Aim of Activity *

Enabler 1: The SNM is accessible to consumers on the proviso they are currently registered with and receiving services from the Adelaide PHN Wellness Connect Commonwealth Psychosocial Support Programs. Aims to:

- Improve integration of local health and auxiliary services and enhance accessibility for people with chronic and complex mental health illness and associated psychosocial disorders.
- Support consumers across four key domains, as identified by the Commonwealth: Housing, Employment, Finance and Education. SNM staff provide 'enhanced' assistance to consumers requiring support and provide referral pathways to other stakeholders.

Enabler 2: NDIS Testing Support aims to support consumers to test and or re-test their NDIS eligibility. The activity I assists with gathering and collating evidence to support an individual's application. This enhanced support will address recognised support gaps and reduce the number of unsuccessful NDIS applications.

Enabler 3: Functional Assessment Support is designed to implement the Recovery Assessment Scale – Domains and Stages (RAS-DS) (as recommended by the Commonwealth). It aims to:

- Assist consumers to take a central role in understanding their own personal recovery progress, make recovery plans and track their own recovery journey.
- Assist mental health workers to work more collaboratively with consumers, enabling recovery planning to be based on the consumer's own reporting via the RAS-DS tool and workbooks and to support the individual appropriately.
- To assist the CSP track recovery outcomes across the program.

Enabler 4: Lived Experience Telephone Support Service (LETSS) aims to provide a peer led telephone and online chat service where people experiencing mental health conditions and their families/carers residing in the Adelaide metropolitan region can receive real-time information, navigation and support during after-hours (5.00 – 11.30pm) that:

- a. is timely and appropriate to their needs
- b. is focused on engagement and empathetic consumer experience (non-clinical)
- c. supports de-escalation of mental health distress
- d. potentially diverts a preventable presentation at an emergency department
- e. assists with access to in-hours mental health services and related services and supports.

Description of Activity *

The Wellness Connect CPSP Enablers activity includes the Service Navigation Measure (SNM), NDIS Testing Support, Functional Assessment and the LETSS.

Enabler 1 SNM: The CSP will employ suitably qualified staff including one Peer Support Worker to support consumers, family members and carers, access one or more of the identified four Domains. Access to the SNM team will be flexible including digital, phone and face to face options. Workers and consumers will have mutual accountability and follow up, with both using the RAS-DS tool to identify goals. The CSP will create Memoranda of Understanding (MOUs) with stakeholder organisations who specialise in service delivery of the identified domains, to develop efficient referral pathways for consumers, collect data (including the number of consumers referred), and the type and number of domains that consumers access.

Enabler 2 NDIS Testing Support: Dedicated NDIS testing support workers will provide one on one individual assistance to consumers wishing to test or retest for the NDIS. The worker will support applicants in gathering appropriate documentation, to engage with NDIA LAC and other appropriate health professionals who will contribute to the consumers' NDIS application and support the consumer through to the conclusion of the application. Adelaide PHN will continue to support the CSP, through bi-monthly meetings with the NDIA in SA, to ensure any barriers and or issues with NDIS applications can be resolved promptly and in a timely manner.

Enabler 3 Functional Assessment Support: The CSP will embed the RAS-DS across the program and will provide ongoing training to staff including strategies to encourage consumers to use the RAS-DS tool and accompanying workbooks. Adelaide PHN has mandated that the tool be used for all consumers accessing the CPS program.

Enabler 4 LETSS: Delivered as a one-to-one, non-clinical telephone and online chat service optimising the mental health lived experience of peer support workers. Provides a lived experience, real-time telephone helpline as a support and potential signposting (or referral) service including, advice, guidance, navigation, emotional mental health support and information to individuals experiencing mental health issues, as well as their family, friends, and carers. All staff delivering the service have a lived experience of mental illness whether personal, or as someone who cares for a family member or friend, with additional training and qualifications in the field of mental health or lived experience. This service provides a seven days per week after-hours only service (between 5.00pm to 11.30pm). It has key links with current services offered by Non-Government Organisations, State and Commonwealth funded services during normal business hours and promotes linkages to CPS services and enablers where appropriate (e.g., for follow-up, referrals).

Activity Consultation and Collaboration

Consultation

Adelaide PHN contractually require the funded commissioned service provider to co-design the SNM project with consumers and other stakeholders.

LETSS has been a fully consumer, carer and stakeholder co-designed service initiative that included NGO's, Local Health Networks (LHNs), the Mental Health Coalition of SA and consumers and carers. Eighty percent of the final design was made by consumers and carers.

Collaboration

LGAs, other NGOs, Service users (consumers)

Other Program Key Priority Area Description

Psychosocial support for severe and complex mental health conditions

Aim of Activity *

The Psychosocial Service Delivery (PSD) program also known as the Wellness Connect NPSP targets individuals who are living with severe mental health conditions and experience an associated reduction in their functional capacity. It supports eligible people residing in the Adelaide Primary Health Network (PHN) region who are not eligible for the National Disability Insurance Scheme (NDIS) or accessing state and territory funded psychosocial support services, to receive appropriate intake assessment, and triage to either one on one support, one on one support (with additional support to test for NDIS eligibility) or group activity -based support program.

Each program stream strives to deliver person centred services and supports based on individual identified needs, assist recovery and if appropriate support eligible people to test their eligibility for the NDIS. The Group Work program is designed for consumers who have been individually assessed for 'group' activities. The Wellness Connect NPSP further aims to support consumers meet identified goals, improve their health and social functioning, improve their mental health and wellbeing and to experience a seamless transition to other services and supports.

The Commissioned Service Provider (CSP) delivering the Program works with a consortium of three other South Australian mental health care providers, with expertise in supporting identified vulnerable communities, including Aboriginal Torres Strait Islander (ATSI), Culturally and Linguistically Diverse (CALD), LGBTIQ+ people and communities. The Program is delivered across the Northern, Southern, and Western regions of Adelaide. These regions have been identified as areas of greatest need, by the

Adelaide PHN Needs Assessment . .

Description of Activity *

Adelaide PHN has commissioned the service provider to support consumers (aged 18-66 years) experiencing severe and complex psychosocial unwellness to access the Commonwealth Psychosocial Support Programs.

The program's service delivery model includes:

- Referral Pathways to the program: GP, Social Worker, Psychologist, Self-Referral, Family/ or Carer and or referred by other Adelaide PHN Commissioned Service Providers
- Intake and Assessment of persons seeking access to the Commonwealth Psychosocial Support Programs. All consumers are offered the Service Navigation Measure Support (SNM) (please refer to Activity CPS 7 – Psychosocial Access Enablers (PAE) for more detail). The Intake Assessment and Referral Decision Support Tool (IAR-DST) is used to conduct initial assessment and referrals into the program.

The program comprises three streams:

Stream 1: CPSP One-on-One Support – community based (including home based) and centre-based supports and services. Includes helping consumers to build skills to: manage their mental illness; manage day to day activities, including fiscal management; find and look after a home; develop strategies to overcome social anxiety and increase social skills and friendship networks; enhance relationships with family. Program duration 1–6-months. Consumers requiring additional support will be triaged to the “groups activity program” (refer below).

Stream 2: CPSP NDIS Testing & One-on-One Support - Consumers entering this stream have severe and complex psychosocial disability. They are offered home based support and additional one on one support to test their NDIS eligibility. Consumers who fail to qualify for the NDIS will be offered the opportunity to re-test for the NDIS. Program duration is 1-6 months.

Stream 3: CPSP Group Activities (formerly COS) - The group activities program's objective is to ensure participants are supported to address their emotional and mental wellbeing, physical health, and social and daily living needs. Participants are encouraged to use their strengths and skills to build their capacity to live an independent lifestyle through improved confidence, self-reliance, and community participation. Relevant cultural understanding shapes the provision of support services to help Aboriginal and Torres Strait Islander people's health, wellbeing, and recovery. The Group Activities are sensitive to the needs of the LGBTIQ+ community and the CALD community.

The CSP conducts a K10+ or K5 at intake, review and at treatment conclusion for each participant in each of the three streams. The RAS-DS tool will continue to be offered to all consumers and CSP staff will receive ongoing training and support on using the tool.

Activity Consultation and Collaboration

Consultation

Adelaide PHN requires the CSP to implement a co-design working group, including service users to ensure the program is meeting the needs of its consumers.

Collaboration

Adelaide PHN works collaboratively with SA Health and the Office of the Chief Psychiatrist, to develop a pathway for consumers to be transitioned to State funded programs, should they be found ineligible for the NDIS after testing and re-testing. In addition, Adelaide PHN and SA Health will continue to align functional assessment tools including the use of K10+, K5 and the RAS-DS to allow for increased integration and transfer of consumers between services.

Adelaide PHN and the CSP work collaboratively with LGAs to create referral access pathways for consumers when they exit the CPSP 'groups' program to enable consumer integration into their local community.
